Background

Work Experience

Full Stack Web Developer at Wildwood Health Institute

January 2018 - Present

WILDWOOD, GA

- Designed and built a customer relationship management software to increase productivity with Go, PostgreSQL, and Svelte.
- Migrated each website from Apache to NGINX to increase performance during high traffic.
- Built websites for organization departments to promote services.
- Rebuilt websites to increase user experience and conversion rates.
- Optimized websites pages for search engines to increase organic traffic.
- Created landing pages to gather user data for promotional use.
- Increased security by implementing best practices.
